

## Ingredients

Our air fresheners are made exclusively from fragrance ingredients approved by the International Fragrance Association ("IFRA"). IFRA is the Switzerland-based global representative body of the fragrance industry. Its main purpose is to ensure that fragrance ingredients are safe for consumers and the environment. It does this with a team of dermatologists, toxicologists, and other experts who evaluate and monitor fragrance ingredients.

We partner with leading fragrance companies to develop fragrances that are safe for consumers and the environment. All our fragrances meet or exceed IFRA's guidelines as well as our stringent internal safety standards.

A list of all approved ingredients for our carefully selected palette can be found on the [IEBA](#) website. Below are our disclosures under the California Cleaning Products Right to Know Act.
